增删改查四大语句 CRUD = insert select update delete

```
drop table if exists `student`
```

1. select语句优先级最高

2. insert语句

insert into XX values ()

insert into XX(C1, C2) values (XX, XX) #其他字段必须有默认值

insert into student values

(null, 'zhangsan', 1, 15, curdate(), 40, 3, 'wangwu@mashibing.com');

insert into student(name, class, email)

values ('lisi', 3, 'lisi@mashibing.com')

3. update语句

update XX set XX=XX, XX=XX where XX

update student set sdate = '2009-09-09', age = 19 where name = 'zhangsan'

4. delete语句

delete from XX where XX

delete from student where name = 'lisi'

delete from student
